## Data Center Advisory

---

The SCC Sequoia data center team advises C-level executives on all facets of data centers; assessment, planning, development and operations.

Our team has:

- developed long-range strategies for Fortune 50 clients, conducted more than thirty risk assessments and delivered more than twenty complex data center projects,
  - delivered the full spectrum of data center advisory services to world-class clients such as JPMorgan Chase, Wells Fargo, Digital Realty Trust and others.
- 

### Do You Have These Concerns?

- Your company lacks a long-range data center strategy
  - You need to rationalize your outsourced colo footprint and lower costs
  - You aren't sure how reliable your data center is, or where the single points of failure exist
  - You are out of capacity and need expert analysis of what to do next
  - You are planning a project and don't have internal resources with successful track records of delivering these complex projects
- 

### Our solutions

- **Risk Assessment** - A proprietary process of non-intrusive inspection of over 800 critical risk points in your data center.
  - **Project Delivery** - A project approach and methodology used successfully in the development of over twenty complex DC projects.
  - **Advisory** - Independent guidance and analysis of capacity planning, risk mitigation, disaster recovery planning, own vs. rent and more.
- 

### What You Get

Independent, objective solutions by data center industry thought leaders to these specialized, complex non-business-as-usual challenges.
